

Karen A. MacIntyre

I left the corporate world in 1999 after 18 years as Principal Hardware Design Engineer in Networking at Digital Equipment and then a Field Application Engineer for Cypress Semiconductor. I then helped my late husband with a start up and taught at Vermont Technical College. I am currently an Electrical Engineering adjunct professor for New Hampshire Technical Institute.

My unique education includes, a BS in Animal and Pre-Veterinary Science and a BSEE equivalent, both from the University of Vermont, along with a MSECE from the University of Massachusetts at Amherst. I became a USCA Conformation judge in 1998, a Schutzhund/IGP judge in 2005, Kormeister in 2006 and RH judge in 2007. I served as USCA's National Breed Warden from 2004-2006 and 2012-2014

I started competing in AKC obedience trials in 1979, NASA Schutzhund trials in 1982, USCA Schutzhund trials in 1983. My first breed show was in 1985 and my first breed survey was in 1987. I have been a member of the SV since 1994. My USCA registered kennel is Mack-Zwinger. I whelped my first litter in 1981 [my first of many SchH3 club dogs came from that litter.] Since then I have titled 18+ dogs to many levels, 11 from my own breeding, most owner raised and trained and breed surveyed. 7 dogs from my breeding program competed in the 2019 WDC.

Some accomplishments of my own dogs: I bred raised and trained 1991 Canadian Siegerin, 2015 and 2019 New England Universal Siegers, 2019 USCA FH champion (also a National competitor, RH2-TB and IPWDA cadaver and water certified) and 2019 Regional IGP3 Champion, V Jaecar vom Mack-Zwinger IGP3 FH KKI, who has earned a spot on the 2021 USCA Universal Team
